

WE KEEP AN EYE ON
YOUR VENDS, SO YOU
DON'T HAVE TO.

GOLDEN EYE[®]
GUARANTEED DELIVERY SYSTEM

AUTOMATIC PRODUCTS
International, Ltd.

A Higher Standard.

NOW SUCCESSFUL VENDS ARE AUTOMATIC, THANKS TO APi'S GOLDEN EYE.®

The falling package breaks the beam of the Golden Eye infrared transmissive sensor, confirming a successful vend.

Our flexible system allows you to choose the operating mode that's best for you. Here's how Golden Eye works:

1. When a customer makes a selection, the spiral rotates one full revolution.	
2. Golden Eye features an infrared transmissive sensor that detects if the product has dropped into the delivery bin.	
"Home" Mode	"Drop" Mode
3. If the product fails to vend on the first try, the spiral will automatically make up to two additional revolutions in an attempt to vend the selection. As soon as the selection drops, the vend is complete and the spiral returns to the "home" position.	3. If the product fails to vend, the spiral runs a partial revolution stopping when the product is detected. This method leaves the spiral in the position where it stops.
4. If, however, the selection still fails to vend after three attempts, the customer can make a new selection or receive a refund.	
5. Golden Eye always returns the spiral to the "home" position for optimal product display.	5. Golden Eye keeps the spiral in its stopping position, minimizing unpaid product loss.

Our Golden Eye guaranteed delivery system watches your vends to maximize your profits by ensuring vend success every time. No more credit vouchers or dissatisfied customers. Just smooth operations all the time, under any ambient lighting conditions.

The Golden Eye infrared transmissive sensor keeps track of what's going down, regardless of the ambient lighting conditions in your customers' locations.

See It. Select It. Get It.

The Golden Eye guaranteed delivery system is a no-charge factory installed option for new merchandiser orders on APi Models 121, 122 and 123 Snackshops. It's also available as a chargeable option on the 320 Á LA CARTE® and Studio® Series. In addition, you can retrofit Golden Eye for installation in the field on existing 120 Series Snackshops, Studio Series merchandisers, and the 320 Á LA CARTE.

To have Golden Eye keep an eye out for you, call your local APi distributor or contact us at 1-800-523-8363 or 651-224-4391. At APi, we've always kept a watchful eye on quality. Now we never even blink.
